You can also use an interactive map at https://sustech.online/transport/bustimer.html, which offers real-time location tracking and full-screen viewing capabilities. Available in both Chinese and English, the map includes detailed routes and real-time arrival information for campus buses. Please note that accessing this site may require a network connection from within China, or the use of a VPN. For convenience, you can use the Google translation tool in Chrome to translate the manual into your preferred language.
